

# Adding Your Site To Google Analytics

## Actions

1. Login to your google account
2. Search in google for "google analytics"
3. Click the top link
4. Click "Admin" in the menu on the right
5. Then click on the box under account and click create new account
6. Then fill in the boxes with the name of your site and the domain name of your site
7. Then click "Get Tracking ID"
8. You're Done

## WordPress

### Actions

9. If you have Wordpress, login to your site
10. Then click "Plugins" in the menu on the right
11. Next click "Add New" and search google analytics
12. After you have done that, click "Install Now" next to "Google Analytics Dashboard for WP (GADWP)"
13. Once it's done installing click Activate
14. Then an additional item should appear in the menu on the right saying, "Google Analytics". Click on it
15. Click "Authorise Plugin"
16. Click "Get Access Code" (Make sure login to your google account)
17. Click on your Google account
18. Click allow
19. Copy the supplied code and paste it into the text box in Wordpress and click "Save Access Code"
20. Then select your Wordpress website domain and click "Save Changes"
21. You're Done
