

Adding your site to google search console

Actions

1. Search “search console” into google (Make sure you are logged in to google)
2. Next click add property
3. Then put your URL into the textbox and click add
4. After which it will ask you to verify, if you have added the site to google analytics then just click verify. If not then add your site to google analytics
5. You’re done

And if you use Yoast how to connect it

Actions

1. Login to your wordpress site
2. Click on Yoast in the menu on the right
3. Then in the menu on the right the option to click search console is shown
4. Once you have clicked search console it will ask you to authenticate your account. Click get authentication code
5. Then a pop up will appear, select your account and click allow
6. Next copy the code it gives you and paste in the text box in yoast and click authenticate
7. Then select the URL of the site your wordpress site is on and click save profile
8. You’re done
